

Dear Mr. Slamecka, Mrs. Roperti, Mrs. Kline, boat
captains and mates,

Thank you for the opportunity to go on
the floating field trip and the wetland study. Some
of the things I learned is how to catch Plankton, and
what Plankton look like. I also learned that the
mud under water is all slimy and like jello. Another
thing I learned is that the water is filled with
tons of tiny creatures.

Some of the parts I enjoyed were
when we got to go in the water and search
for creatures in the elodea. Also when we were
on the boat and looked through the algae in those
bins and tried to identify creatures. Also when
we looked in the samples of mud.

Sincerely,
Nathan
